The default value (2.96 mg per 1 fl. oz) of sodium in the water used in calculations represents the highest level of sodium in water used in our bottling facilities. The USDA National Nutrient Database for Standard Reference Release 26 has a value of 1 mg sodium per fl oz of municipal water.

The information provided in this document was compiled from an online tool made available by The Coca-Cola Company. This online tool is intended to assist Customer in complying with FDA menu labelling regulations. The nutrient values provided are based on U.S.D.A. data, vendor data, laboratory analyses and scientific literature. Coca-Cola certifies that the nutrient values are accurate and complete as of the date this certificate is printed.
